

Send Matic to MetaMask Wallet

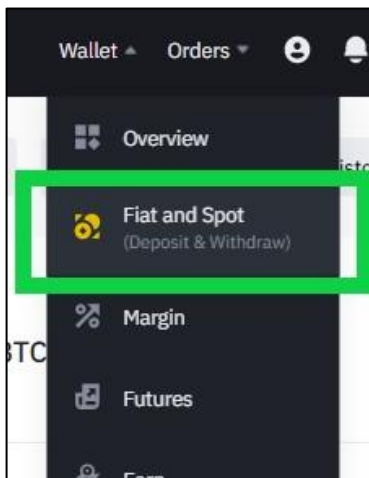

PEST FREE
TOKEN
Pest eradication made easy

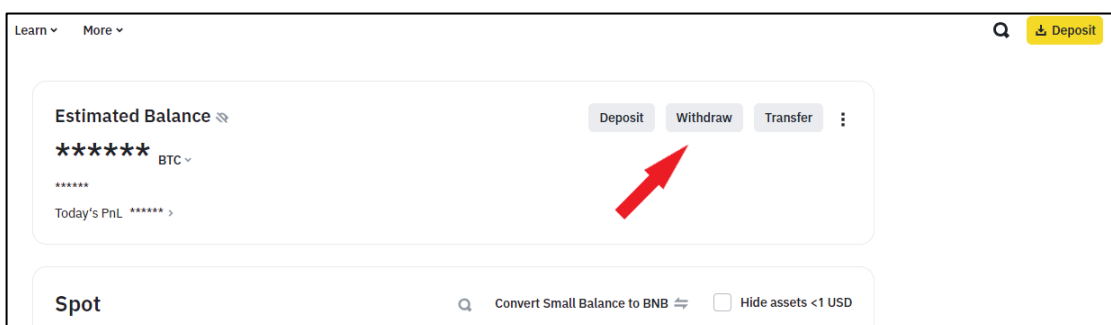

1. Open MetaMask and ensure the '**Polygon Mainnet**' Network is selected.
2. Click on the copy address icon.

3. On your exchange (this tutorial uses Binance) select the **Fiat and Spot Wallet**.

4. Click **Withdraw**.

5. The withdrawal screen contains multiple parts that need to be correct. These are:

The screenshot shows the 'Withdraw Crypto' interface. It includes a 'Select coin' dropdown set to 'MATIC Polygon' (callout 1), a 'Send to' address field containing a long alphanumeric string (callout 2), a 'Label' section with 'Network' set to 'MATIC' and 'Whitelist' checked (callout 3), a 'Withdraw amount' field set to '50' with a 'MAX' button (callout 4), a 'Network Fee' of '0.08 MATIC' (callout 5), and a 'Receive amount' of '49.92000000 MATIC' (callout 5). A yellow 'Withdraw' button is located at the bottom right (callout 6). An FAQ section is visible on the right side of the interface.

1. Ensure **Matic Polygon** is selected,
2. Ensure the address from your MetaMask wallet has been pasted here, this can be done via the address book feature or by pasting the address directly into the address field.
3. The selected network must be **MATIC**
4. Type in the amount of Matic you wish to withdraw or click the max button if you wish to transfer everything held in the exchange wallet.
5. Check the receive amount that will arrive in your MetaMask Wallet, noting it is less fees.
6. All correct? Click the **Withdraw** yellow button

6. You will be asked to authenticate the transaction.

7. Several minutes later refresh your MetaMask Wallet and the Matic will appear.
